Label Printing Terminology

Adhesive
- Back - Adhesive is on the back of the label. If this label is being applied to a window, it will go on the outside of the window.
- Face – Adhesive is on the front of the label. If this label is being applied to a window, it will go on the inside of the window.

Backside Printing
Copy is printed on the liner of the label. This printing method is used to offer coupons or convey additional information.

Bleed
Ink extends to the edge of the label.

BOPP Stock
Biaxially-Oriented Polypropylene.

Cores
The inner diameter of a roll of labels. The standard finishing is coreless. 1" and 3" cardboard cores are available upon request. For additional sizes, see sales associate.

Emboss
An image is pressed into the material to raise it above the normal level of the material.

Extended Life Durable Decals
Labels are manufactured to withstand harsh environments and rugged applications. Durable for up to 4 years.

Lamination
Clear plastic coating that provides extra durability.
- Matte – Can be written on
- Textured – Used to add texture to labels
- Shiny – Shiny coating

Machine Applied
These labels are set up to meet the requirements of the machine that will be applying them. The core size, rewind direction and maximum roll size will often need to be confirmed.

Opaque
A darkened adhesive used as a "cover up". Restricts copy from showing through the face stock.

Perforation
Liner is perforated between the labels allowing them to be easily separated.

Pli-a-Print Stock
This material is good for application to plastic bags or uneven surfaces.

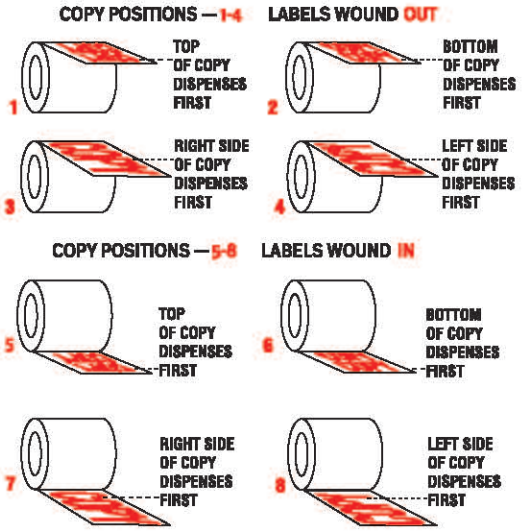
Pressure Sensitive Label
A self-adhesive label that is easily applied to a surface by pressure.

Process Color Printing
Also known as Four Color or Full Color Printing. The use of four ink colors (Cyan, Magenta, Yellow and Black) to create an image, such as a photograph.

Repositionable Labels
Patterned adhesive that allows the label to be applied and reapplied to almost any surface. Removes cleanly leaving no residue.

Reverse
Image is created by the label stock color showing through the ink coverage.

Rewind direction



Single
Labels are individually cut and stacked.

Spot Color Printing
The use of one ink for each color printed. Separate plates are required for each ink color being applied to a material.

Static Cling
Labels have no adhesive and adhere to glass or other smooth surfaces with static electricity.

Square Cut
Also known as Butt Cut or Kiss Cut. These labels are cut exactly to size with no excess liner around the label. Order any size from 1/4" x 1/4" to 12" x 38".

Tint
The entire surface of the label stock is covered with ink. Also known as flood coat.

Varnishes
Liquid coatings that are printed onto the label surface.
- UV – UV-cured varnish, very high gloss
- Water based – Protects label from slight moisture, less durable than UV varnish
- Matte – Dull varnish, can be written on
- Spot – Only part of the label is varnished

Weatherproof Labels
These labels can withstand heat, cold, water and sunlight for up to 1-1/2 years.

Popular Type Styles

All type styles are available in any size. We carry the entire Adobe® and Corel font libraries. For additional information please see sales associate.

Ordering Made Easy

SIMPLY ANSWER THESE QUESTIONS BELOW AND YOU'LL HAVE EVERYTHING YOU NEED TO PLACE AN ORDER.

1. What will the size and quantity be?
2. What is the paper stock and ink color?
3. What will the label be applied to? (different surfaces may require certain paper stocks or adhesive options)
4. What will the label be exposed to? (water, solvents, dust, outdoor elements, etc.)
5. Will the label be hand or machine applied? (core size, roll quantity, rewind direction, etc.)
6. Is custom finishing or packaging required? (shrink wrap, drop shipping, quantity per carton, etc.)
